

## Publication Agreement

This is a publication agreement<sup>1</sup> (“this agreement”) regarding a written manuscript currently entitled

Non-parametric estimation of Jensen-Shannon Divergence in Generative Adversarial Network Training

(“the article”) to be published in PMLR (“the proceedings”). The parties to this Agreement are:

AMBRISH RAWAT

(name of corresponding author who signs on behalf of any other authors, collectively “you”) and PMLR, (“the publisher”).

1. By signing this form, you warrant that you are signing on behalf of all authors of the article, and that you have the authority to act as their agent for the purpose of entering into this agreement.
2. You hereby grant a Creative Commons copyright license in the article to the general public, in particular a Creative Commons Attribution 4.0 International License, which is incorporated herein by reference and is further specified at <http://creativecommons.org/licenses/by/4.0/legalcode> (human readable summary at <http://creativecommons.org/licenses/by/4.0>).
3. You agree to require that a citation to the original publication of the article in the proceedings as well as a hyperlink to the PMLR web site linking to the original paper be included in any attribution statement satisfying the attribution requirement of the Creative Commons license of paragraph 2.
4. You retain ownership of all rights under copyright in all versions of the article, and all rights not expressly granted in this agreement.
5. To the extent that any edits made by the publisher to make the article suitable for publication in the proceedings amount to copyrightable works of authorship, the publisher hereby assigns all right, title, and interest in such edits to you. The publisher agrees to verify with you any such edits that are substantive. You agree that the license of paragraph 2 covers such edits.

<sup>1</sup>The language of this publication agreement is based on Stuart Shieber’s model open-access journal publication agreement, version 1.2, available at <http://bit.ly/1m9UsNt>.

6. You further warrant that:

1. The article is original, has not been formally published in any other peerreviewed journal or in a book or edited collection, and is not under consideration for any such publication.
  2. You are the sole author(s) of the article, and that you have a complete and unencumbered right to make the grants you make.
  3. The article does not libel anyone, invade anyone's copyright or otherwise violate any statutory or common law right of anyone, and that you have made all reasonable efforts to ensure the accuracy of any factual information contained in the article. You agree to indemnify the publisher against any claim or action alleging facts which, if true, constitute a breach of any of the foregoing warranties or other provisions of this agreement, as well as against any related damages, losses, liabilities, and expenses incurred by the publisher.
7. This is the entire agreement between you and the publisher, and it may be modified only in writing. It will be governed by the laws of the Commonwealth of Massachusetts. It will bind and benefit our respective assigns and successors in interest, including your heirs. It will terminate if the publisher does not publish, in any medium, the article within one year of the date of your signature.

I HAVE READ AND AGREE FULLY WITH THE TERMS OF THIS AGREEMENT.

## IBM ASSENT TO ASSIGNMENT

Date: 13 October 2017  
Log no: IRE1710-012

IBM assents to the assignment of any copyright ownership that IBM may have in the IBM employee-written work of authorship ("work"):

Non-parametric estimation of Jensen-Shannon Divergence in Generative Adversarial Network training

by: Sinn, Mathieu, Rawat, Ambrish

to the publisher of: AISTATS

This assent is contingent on the publication of the work by the publisher identified above. IBM and the author shall each have and reserves the royalty-free right in the work in which IBM assents to an assignment of copyright, to reproduce, prepare derivative works, distribute, publicly display and perform the work (1) to a selected listing of the scientific community prior to publication by the publisher, (2) for IBM internal purposes prior to or after publication by the publisher, (3) to members of the scientific community outside of IBM in response to specific requests or for peer communication, and (4) for any other purpose deemed by IBM, in its sole discretion, as required by United States or foreign law.

Manager's Signature: Wendy Belluomini  
Manager's Printed Name: Wendy Belluomini  
Date: 19 Feb 2018

## TO THE AUTHOR:

Most publishers will supply you with their own copyright transfer agreement which you may sign yourself in your individual capacity (not as a representative of IBM). You must, however, also attach the "IBM Assent to Assignment", which must be signed by your manager and sent to the publisher as part of the publisher's copyright transfer agreement. **Please note that neither the publisher's copyright transfer agreement nor the IBM Assent to Assignment document should be signed if copyright has already been transferred to another publisher.**

If you decide to sign the publisher's copyright transfer agreement, please be advised you are doing so in your individual capacity (not as a representative of IBM); attach (i.e., staple) the top part of this form ("IBM Assent to Assignment") to that copyright transfer agreement; and forward both to the publisher. You may wish to seek private legal advice (at your expense) before signing the publisher's copyright transfer agreement and retain a copy of any signed documents for your files.

NOTE: You may not transfer any copyrighted work to a second publisher unless the first publisher has decided not to publish and has notified you of that fact in writing. Nothing contained in these instructions represents legal advice by IBM or any IBM attorney to you in your individual capacity.
